

AEGIS

PAINT PROTECTION FILM

**PREMIUM PROTECTION,
DESIGNED TO LAST**

AN INVISIBLE SHIELD ON CARS

Paint protection films (PPF) are transparent films that cover your car's exterior. PPF protects your car from:

- Environmental debris, such as dust, dirt & sand
- Scratches, rock chips and other abrasives that may damage the paint
- UV rays that may fade or dull your car's shine

PPF helps your car maintain its new look and value for longer

MADE WITH TPU

TPU stands for aliphatic Thermoplastic Polyurethane. TPU is the preferred material for true PPFs, as opposed to PVCs and TPHs because it is:

- Soft and elastic, but not brittle
- Coated with elastomeric polymers on the top layer
- Resistant to UV oxidation and yellowing

The TPU provides impact resistance & gives a better finish at the time of installation. The top coat on it gives self-healing properties to PPF, which means it can repair minor scratches & scuffs by itself.

THICKEST PPFs IN INDIA

Generally, PPFs are 140 to 200 microns thick. But CarzSpa Aegis has developed the thickest range of PPFs in the country. One of them has 250 microns thickness, while the thickest one is 300 microns. This is a first in India by CarzSpa Aegis. These PPFs offer enhanced scratch protection, colour-fading prevention and self-healing.

THICKEST
PPF

ETERNAL 300

This PPF is the supreme version in Aegis with an extraordinary thickness of 300 microns for maximum protection while inheriting all the advanced characteristics of other PPFs. It is so thick that it will not be damaged forever.

*CarzSpa offers a
Lifetime warranty
on Eternal 300*

ULTRA 250

The new and improved CarzSpa Aegis Ultra 250 ranks among the most advanced and premium PPFs, with a 250-micron thickness. It comes with our special UV-resistant top coat which prevents the film from getting oxidised and has superior self-healing and water-repellency properties. This innovative film is extremely durable and comes with a 10-year warranty.

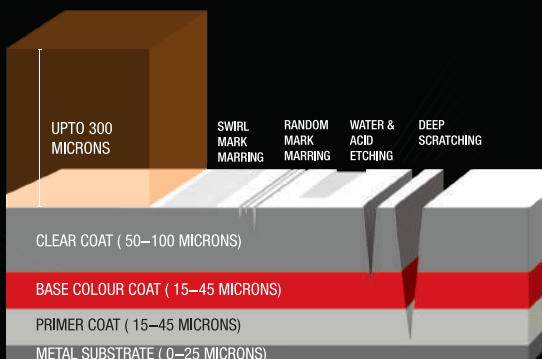

LAYERS OF PROTECTION

Your car's surface has two layers: Paint and Clear Coat

- They are only 130–150 microns thick
- They can get easily scratched and expose the metal
- They can get damaged by debris, rock chips and scratches

With CarzSpa Aegis PPF, another layer of protection gets added

- Up to 300 microns thick, it is almost double the paint thickness
- The elastomeric properties absorb shock better to prevent impact on paint
- Self-healing top coats repair minor scratches and scuffs by themselves
- Keeps your car looking new and premium for a longer time

INSTALLATION IS THE KEY

PPF is a crucial investment for your vehicle. Choosing the right film and expert applicator is important.

Installing Paint Protection Film may look easy, but it can be extremely difficult and requires expertise. The most technical and challenging parts of installing PPF on your car are:

- Stretching the film properly to avoid wrinkles and bubbles.
- Placing it on the correct edges to ensure full coverage and alignment
- Cutting only the required parts and tucking it tightly in

At CarzSpa, our trained installers have a keen eye for perfection and the subtle aspects of applying the films, to ensure you get the best out of your Aegis PPF. After all, no one details like we do.

COMPLETE COVERAGE

CarzSpa Aegis PPF can be applied anywhere on the car and given full vehicle coverage for maximum protection, you can also choose only the damage-prone areas, such as:

- Bumpers, fenders and roof
- Rocker panels and boot
- Doors and rearview mirrors

SPX

Aegis SPX is a special PPF that is coated with a special gloss—enhancing coat

- Comes with a 7—year warranty and provides insane shine
- Has a thickness of 185 microns for high—impact resistance
- Provides complete protection against rock chips, scratches and nicks
- Has self—healing and anti—yellowing properties

MATT

CarzSpa Aegis Matt gives your car a sleek, modern look with a non—reflective finish

- Perfect for those who prefer a more understated aesthetic
- Can also be used to alter the finish of any glossy automotive paint
- Comes with a thickness of 185 microns, and a 5—year warranty
- Self—healing properties can repair minor damages with heat
- Has UV resistance to prevent the film from yellowing

ARMOR

Aegis Armor is a value-efficient PPF that provides pure scratch protection

- It comes with a thickness of 170 microns, for great durability to the paint
- Has a supreme gloss finish on the top, comes with a 5-year warranty
- Protects car paint from rock chips, scratches and nicks
- Prevents yellowing and can self-heal minor scratches

HYBRID

Aegis Hybrid is a PVC and TPU mix PPF that provides great gloss, along with scratch protection and stain resistance

- Comes with a thickness of 155 microns
- Guards the car's surface paint from rock chips and scratches
- Can self-heal with some heat application
- Comes with a 3-year warranty
- Comes in three variants: Clear, Matt and Black

REAR VIEW MIRRORS
