AUTOMOTIVE BELTS
W.E.F.: June 01, 2025

VISION

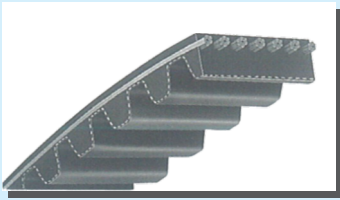

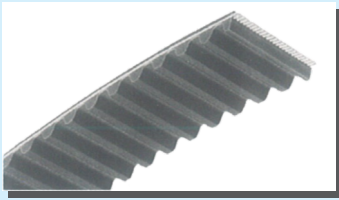

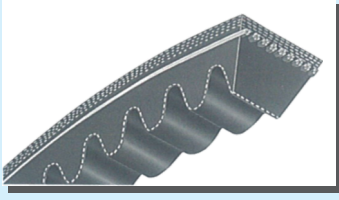

CORPORATE PHILOSOPHY	To give attentive consideration to both humanity and nature
BASIC MANAGEMENT POLICY	To contribute to society by supplying goods of high performance, high precision and high quality
COMPANY MOTTO	Produce Quality and Sell Quality

QUALITY POLICY

We, the management and employees of MITSUBOSHI BELTING INDIA PRIVATE LIMITED are committed to manufacture and provide quality products and services that meet the increasing needs of customers, to pursue quality leadership and to merit customer's trust and satisfaction.

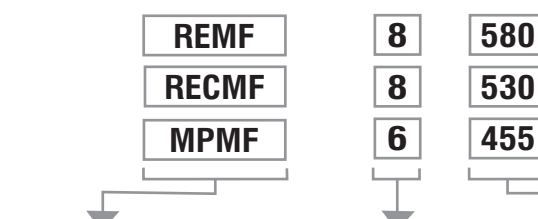

APPLICATIONS

Power Transmission Belts

Types		Applications
Timing Belt	 Rubber	Automotives, tooling machines, textile machinery, OA equipment, medical equipment, vending machines, household electrical appliances, measuring instruments.
	 Polyurethane	
Raw Edge V-belt	 MPMF	Automotives, agricultural machinery, blowers, dynamos, escalators.
	 RECMF	
V-ribbed Belt	 Rubber	Automotives, health apparatus, dryers for home and business, printing machines, machine tools.
Variable Speed Belt		RCVS Gear Changers, scooters and agricultural machinery.

Size Designation

(1) Raw Edge Belt

Nomenclature
Letter code represents construction of belt

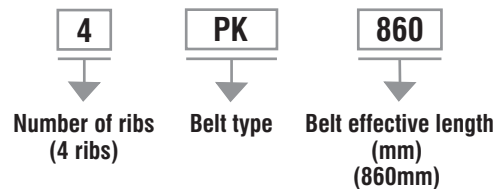

Letter Code	Construction
REMF	Raw Edge Plain
RECMF	Raw Edge Cogged
MPMF	Raw Edge Multi-ply

Type

The first digit represents the type of belt

Number	Belt Type
1	HM
6	A
8	B
3	BC
9	C
4	CD

(2) V - Ribbed Belt

Length

The last three digits represent effective belt length (inch).

For your Safety

Danger

- ◆ Do not use a belt as a lifting tool.
- ◆ Make sure the engine is completely stopped before inspecting or replacing a belt.

Warning

- ◆ Follow the instructions in the maintenance manual provided by each car manufacturer thoroughly when inspecting, replacing or tensioning a belt.
- ◆ Select the manufacturer's recommended belt by checking type and model of your car.
- ◆ In case of matched set application, replace all the belts at once using ready-paired belts.
- ◆ If there is any indication of damage as shown in the catalogue, replace the belt immediately.
- ◆ If the belt is not properly seated into the pulley groove due to a worn-out pulley, or if the pulley has been damaged, replace the pulley immediately.
- ◆ Avoid contact with engine oils and other chemicals on the belt since it will shorten the life expectancy of the belt.

For the purpose of replacing belt or pulley, and adjusting of belt tension or pulley alignment, we recommend you consult a certified repair shop.

High Performance Automotive Belts

**Around the Globe the World's Best Companies Trust
Mitsuboshi to Provide Industry Leading Belting Products...
You Should Too!**

ENGINEERING

We provide elaborate solutions that fit your belt application by using state of the art technology. Our engineers continuously improve our products focusing on belt design, in-depth testing and simulations.

RESEARCH & DEVELOPMENT

Our R&D laboratories in Japan emphasize on material research to the highest degree in order to constantly improve the quality of our belts and respond to even the most severe OEM prerequisites.

INNOVATION

Applying our latest R&D findings to introduce new products we constantly aim to come up with ground-breaking novelties that satisfy your requirements – no matter how challenging the application may be.

QUALITY STANDARDS

Mitsuboshi maintains the strictest quality standards. Our domestic and overseas factories have obtained ISO 9001 or IATF 16949 quality certification in addition to ISO 14001 environmental certification.
